# Truong Van Hung

## Front-End Developer

**Phone:** 0964467833

**Email:** vanhung.work29@gmail.com

**Website:** https://hungg2951.github.io/portfolio

**Address:** Tu Liem, Ha Noi

## OBJECTIVE

Frontend Developer with over 3 years of experience building web applications using JavaScript and React. Skilled in developing user interfaces with a strong focus on performance, scalability, and user experience. Seeking to join a professional environment to contribute to high-quality products while expanding Fullstack development skills and delivering long-term value to the company.

## EDUCATION

2025 - Present

**University of Transport and Communications**
Major: Information Technology

08/2020 - 01/2023

**FPT Polytechnic**
Major: Web Programming and Design
Graduated with Distinction

## WORK EXPERIENCE

4/2024 - 6/2026

**VINCO Solutions Co., Ltd**
**FullStack Developer**

Developed and maintained an eCommerce system using Next.js and React.js, ensuring a user-friendly, responsive interface and optimized user experience.

Tech stack: **Medusa.js (core, custom modules), Node.js, TypeScript, PostgreSQL, Next.js, React, Tailwind CSS, Zustand, TanStack Query, Stripe, PayPal, AWS (SES, S3)**.

Built and implemented key features:

- **Shipping Profile**: Configured shipping fees based on regions and order conditions.
- **Gift Card**: Created, managed, and applied gift cards during checkout.
- **Free Gift**: Automatically added promotional products based on conditions (order value, products, campaigns, etc.).

Developed custom features based on business requirements:

- **Design Customization**: Enabled users to personalize products (text, images, options, etc.).
- **Customer Segmentation**: Designed logic to segment customers based on conditions (purchase behavior, order value, location, etc.) to support marketing **campaigns** and **promotions**.
- Expand and modify the system logic to meet the specific requirements of the business.
- Integrated and worked with **Medusa.js** to build and enhance eCommerce backend functionalities.

Designed and consumed **REST APIs** to connect frontend and backend, ensuring stable and synchronized data flow.

Worked with **PostgreSQL** for database design and data querying across modules.

Optimized application performance using techniques such as **SSR/SSG**, **lazy loading**, and **code splitting** to improve page load speed and **SEO**.

Customized and extended **Medusa.js** using **custom modules**, **workflows**, and **hooks** based on business requirements.

Collaborated with cross-functional teams to develop and deploy new features following **Agile/Scrum** methodologies, using **Git** for source code management.

3/2023 - 3/2024

**Daco Company Limited**

**Frontend Developer**

- Developed a responsive e-commerce web application using **React.js / Next.js**
- Built key pages including **Product Listing, Product Detail, and Shopping Cart**
- Integrated RESTful APIs to fetch and display product data
- Implemented **add/remove/update cart functionality**
- Managed application state using **useState, useEffect, and Context API / Zustand**
- Designed UI using **Tailwind CSS / Ant Design**, ensuring cross-device compatibility
- Handled form validation using **React Hook Form** (login, register, checkout)
- Improved user experience with **debounced search and lazy loading images**
- Implemented **loading states and error handling** for API calls
- Collaborated using **Git (GitHub/GitLab)** with feature branching and pull requests
- Followed **Agile/Scrum methodology** (daily meetings, task tracking)
- Fixed bugs and refactored code to improve maintainability and readability

10/2022 - 02/2023

**VTC NetViet Media Corporation**

**Frontend Intern**

- Assisted in developing and maintaining web applications using **React.js**
- Converted UI/UX designs (Figma) into responsive web interfaces
- Collaborated with backend developers to integrate **RESTful APIs**
- Fixed UI bugs and improved performance for existing features
- Supported implementation of reusable components to improve development efficiency
- Participated in code reviews and learned best practices in frontend development
- Worked with **HTML, CSS, JavaScript (ES6+)** for building interactive UI
- Used **Git** for version control and collaborated with team members via pull requests
- Gained experience working in a **real-world Agile/Scrum environment**
- Learned to debug issues and optimize code under mentor guidance

## SKILLS

| | |
|---|---|
| **Programming languages** | • **JavaScript, TypeScript** |
| **Library, Frameworks** | • HTML, CSS, Tailwind/Bootstrap Css, Ant Design<br>• ReactJs, Nodejs, NextJs, Angular, ES6, React-hooks, Redux-toolkit, TanStack Query<br>• Restfull API, Async/Await, Promise, JWT<br>• Reponsive website |
| **DataBase** | • PostgreSQL, MySQL, MongoDB/Express |
| **Tools** | • Visual Studio Code, Postman, MongoDBCompass, Git, pgAdmin4 |
| **Work process** | • Agile/Scrum |
| **Other** | • Jira/Trello, Adobe Photoshop, Figma |

## PROJECTS

12/2022 - 2/2023

**Movie theater management website**

**Front-end**

Design the user interface and build the database for the system.

Develop the functionalities:

- Registration and Login (Express Token)
- Build a cinema management system with functions such as: managing screening rooms, seating charts, movies, showtimes, etc.
- Develop a ticket booking and payment flow integrated with **VNPay**.
- Build a feature to send confirmation emails after successful ticket bookings.
- Apply a full-stack solution using **React/Next.js** and **Node.js**, connecting to a database to manage system data.

The project received positive feedback from all judges.

## HONORS & AWARDS

| | |
|---|---|
| 2025 | Outstanding Young Employee of the Year |

## INTERESTS

Programming, listening to music, playing sports, playing games.
